### Notes:

\* Size is standard

British Cheeks are matched to noseband spread, American sizing would yield 8 or 9" for snaffles and 10 or 11" for pelhams in most cases

X/C is sized for more thoroughbred type noses) but the rest is Full Size

X/F is sized more for horses with european heads, deep throats and the noseband has less taper

This matrix is a guideline when one is looking at manufactured bridles and will be a good reference as to what you are buying and whether or not it will fill in a way that you desire.

Equusport Bridles have been adapted to the horses we are riding today and are fully customize able even with regard to our stock bridles. Additionally, you can buy separates, extra cheeks, different crowns or nosebands as needs require.
